

Snippet

ANZ Australia Cyber Security Management Job Simulation on Forage - June 2024

- Completed a simulation focussed on identifying cybersecurity threats at ANZ
- Investigated e-mails to report suspicious items
- Analysed a Packet Capture file using an open source tool to identify and investigate any potential threats

"Why are you interested in this role?"

- I recently participated in ANZ's virtual job simulation on the Forage platform, and it was incredibly useful to understand what it might be like to participate on a cybersecurity team at ANZ.
- I worked on a project to identify cybersecurity threats and practiced identifying phishing emails and analysing a packet capture file in a real-world context.
- Doing this program confirmed that I really enjoy working on complex security threats and I'm excited to apply these skills on a cybersecurity team at a company like ANZ.
