Tata Cybersecurity Security Analyst Job Simulation on Forage - June 2024

- Completed a job simulation involving identity and access management (IAM) for Tata Consultancy Services, collaborating with a Cybersecurity Consulting team.
- Acquired expertise in IAM principles, cybersecurity best practices, and strategic alignment with business objectives.
- Delivered comprehensive documentation and presentations, showcasing the ability to communicate complex technical concepts effectively.

"Why are you interested in this role?"

- I recently participated in Tata Consultancy Services' job simulation on the Forage platform, and it was incredibly useful to understand what it might be like to participate on a Cybersecurity Consulting team at Tata Consultancy Services. I worked on a project to enhance identity and access management strategies. I practised using industry-standard IAM tools and built my cybersecurity skills in a real-world context. Doing this programme confirmed that I really enjoy working on cybersecurity challenges, and I'm excited to apply these skills on a Cybersecurity Consulting team at a company like Tata Consultancy Services.
