Commonwealth Bank Introduction to Cybersecurity Job Simulation on Forage - June 2024

- Completed a job simulation involving the role of a cybersecurity generalist, specializing in fraud detection and prevention for Commonwealth Bank's Cybersecurity team.
- Developed skills in building data visualization dashboards using Splunk to uncover patterns and insights in historical customer data, aiding in fraud detection.
- Demonstrated the ability to respond effectively to cybersecurity incidents, including notifying relevant teams, collecting information, containing and stopping attacks, and aiding in recovery efforts.
- Enhanced security awareness expertise by designing infographics promoting best practices for secure password management, following Australian Cybersecurity Centre advice.
- Acquired practical experience in penetration testing, assessing the security of web applications, identifying vulnerabilities, and providing recommendations for remediation to bolster cybersecurity defenses.

"Why are you interested in this role?"

- I recently participated in Commonwealth Bank's job simulation on the Forage platform, and it was incredibly useful to understand what it might be like to participate on a Cybersecurity team at Commonwealth Bank.
- I worked on a project to uncover and exploit web application weaknesses via a comprehensive penetration testing report. I practiced using HackThisSite and built my penetration testing skills in a real-world context.
- Doing this program confirmed that I really enjoy working on mitigating and responding to cyber incidents, and I'm excited to apply these skills on a Cybersecurity team at a company like Commonwealth Bank.
