

Voicemail

Part 1: Voicemail to Stefan (Memo Not Possible)

Due to limitations, I cannot directly create or upload a voicemail. However, I can provide you with a script for your voicemail to Stefan.

Voicemail Script (1 minute, 20 seconds):

Hi Stefan, this is [Your Name] from the Cybersecurity team. I'm calling to follow up on the information security assessment for Boldi AG.

As a first step, I wanted to discuss who we should interview at Boldi AG to get a comprehensive understanding of their security posture. It would be helpful to speak with both management and technical staff.

Specifically, talking to management would provide insights into their security culture, risk tolerance, and overall business objectives. Interviewing engineers would give us a ground-level view of their security practices, controls, and any existing vulnerabilities they've identified.

By getting perspectives from both sides, we can create a more accurate picture of Boldi AG's security environment.

Please let me know if you have any suggestions on who we should speak with at Boldi AG, or if there's any additional information you think would be helpful.

Thanks,
[Your Name]

Speaker Notes:

This voicemail briefly explains the purpose of your call and highlights the importance of interviewing both management and engineers at Boldi AG. It suggests potential topics for discussion based on the audience and concludes with a request for Stefan's input.
