

Your Role

Your Role

- You are an identity and access management (IAM) developer, a key role within the cybersecurity team at Tata Consultancy Services (TCS).
- Your primary responsibilities include assessing IAM readiness, designing tailored solutions, and planning the implementation of an IAM platform for TechCorp Enterprises, a global technology conglomerate.

Your Goal

- Gain a strong grasp of IAM concepts and their significance in modern enterprises, ensuring you can effectively contribute to TechCorp's security objectives.
- Evaluate TechCorp's readiness for IAM implementation.
- Craft customised IAM solutions for TechCorp, aligning them with its business processes and objectives to enhance security.
- Plan a comprehensive project for implementing an IAM platform at TechCorp, addressing integration challenges and ensuring secure access to digital resources.
